DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 8-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Choi (5,835,150).

Regarding claim 8, Choi discloses an image format converter showing a first memory (col. 3, lines 60-62), a second memory (col. 3, lines 62-64), and a feeder (col. 6, lines 13-19).

Regarding claims 9-10, and 12-14, the controller 24 inherently includes a line address computer for addressing or calculating the starting address of video data, which includes luminance and chrominance data. Conventionally, luminance data and chrominance data are stored in separate areas of a memory. In order to access to access to these data, separate addresses are needed.

Regarding claim 11, see Figures 24, 28, and 32.

Response to Arguments

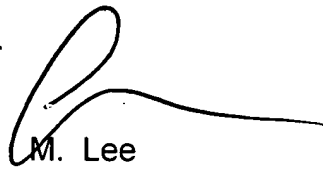

3. Applicant's arguments with respect to claims 8-11 have been considered but are moot in view of the new ground(s) of rejection.
